- Must be connected to at least 20 amp service
- No more than 50' of 10 gauge extension cord
- Turn on blower & guide unit until inflated
- Secure all tether straps after fully inflated
- Do a safety check of blower & unit (bare wires & leaks)
- Never operate in winds in excess of 20 mph
- Never leave units unattended!
- If operator leaves, unit must be unplugged
- Store blower in secure area when not attended

Limitations

- Number of operators: 1 (moonwalks)
- Number of operators: 2 (slides)
- Max number of passengers: 5 (moonwalks)
- Max number of passengers: 6 (slides)
- Minimum height: 36"
- Maximum height: 60"
- Maximum weight of player: 150 lbs.
- Maximum passenger weight: 600 lbs.
- All outdoor use must be staked!

Safety Rules

- Designate appropriate number of operators
- Read & understand all instructions on unit and in this manual
- Never allow passengers to enter until fully inflated
- Instruct riders that there will be no flipping, splits, tumbling or any other gymnastic
- No jewelry, eyeglasses, belts, and any sharp items must be removed
- Unit will deflate if power fails for any reason, riders must exit ASAP
- Under no circumstances should unit be used wet or during rain!
- Do not overload, avoid contact with others & do not land on your head!
- Only allow kids of equal size to use at the same time

Operators Take Control!

- Wear whistle at all times
- Never allow any climbing on exterior or interior walls
- Do not overload! Max weight 600 lbs.
- Assist participants entering & exiting unit
- Instruct participants that if they fall they should protect their head & neck
- The safety of all participants is in your hands to pay very close attention
- Never allow kids of different abilities or sizes play in or on at the same time

Slide Specific Rules

- Slides require 2 (two) operators. One at entrance helping participants enter & exit and one at the top enforcing the following rules...
- No water is to be added to the sliding surface (this includes rain) as this causes participants to slide too fast, possibly allowing them to go through buffer dropping them on the ground!
- Unplug unit if winds exceed 20 mph
- No more than 6 (six) participants on slide at one time
- No more than 600 lbs. on inflated surface at any one time
- If power fails unit will deflate, so players need to dismount from unit ASAP
- No one participant can weigh over 120 lbs. as they can travel through the buffer and land on the ground!
- No jumping, flips, tumbling, or any other type of gymnastics!
- No climbing or sitting on any surface that is not white
- One person at a time and next person must wait until landing area is clear
- No head first slides, as head and neck can be injured!
- Ground stakes & straps must be checked hourly and if found to be loose they must be
- Retighten or discontinue use if stakes become loose
- The safety of the kids playing is now in your hands, do not allow participants to get out of hand (have a time out area, if needed)
- If asked, CBR will furnish whistles to help control and patrol!

Dunking Booth Rules

- After event, unit must be drained of all water and tilted back onto transport wheels.
- This will ensure no one drowns or falls into empty tub.
- Replacement balls are \$10.00 each

*I have read and understand the instructions on the safe operations of this equipment and will enforce all of the rules covered herein. **BY SIGNING YOU AGREE THAT YOU WILL ONLY ALLOW CHILDREN TO PARTICIPATE.***
